2026 Price Guide

DESIGNER METALS

from concept to completion

One must dare to explore the depth of each layer of the design process, this is how we create works of pure brilliance.

Take a look at our design process and you will see no detail left unnoticed. We start on paper and take from our extensive research to create bold lines and unique textures. We play with combining different materials to evoke visual interest. Pair that with our striking finishes in polished, brushed and matte textures and you get sophisticated styles crafted with care.

Track Size	1.5' to 2'	4'	6'	8'	10'	12'	14'	16'	20'	24'	28'	32'	36'	40'
Price	$99	$198	$297	$396	$495	$594	$693	$792	$990	$1,188	$1,386	$1,584	$1,782	$1,980
								MOTORIZATION MAXIMUM						

Orders over 8 feet will be spliced. Motorized rods over 8 feet Kirsch recommends a split draw application.

To price a double rod application. Please follow the following steps.
1. Determine what the rod configuration will be for the first rod. Find the price based on the length above.
2. Determine what the rod configuration will be for the second rod. Find the price based on the length above.
3. Add the price of the two rods together to get the total cost of the double rod configuration.
If you are adding motorization to one or both rods, add the AMP Motorization Upcharge of $621.00 per rod.

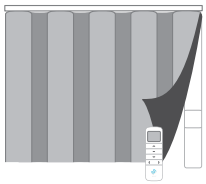
Traverse Rod Operating Systems

Motorized Draw

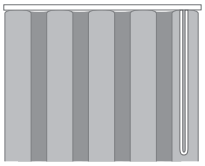
AMP™ Motorization



- Easy to use
- Quiet, powerful motor
- Pleated or Ripplefold™
- For Hollis™ Traverse Rods, Estate™ Traverse Rods or Architrac® Series 94001
- For more information, see page 50

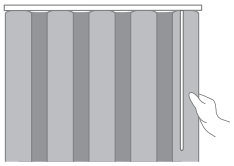
Manual Draw

Cord Draw



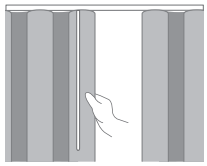
- Easy to use
- Pleated or Ripplefold™
- For Estate™ Traverse Rods only

Hand/Baton Draw



- Easy to use
- A gentle tug allows drapery to glide across track
- Pleated or Ripplefold™

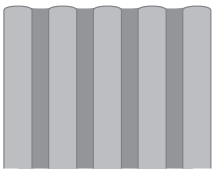
Baton Duplex Draw



- Easy to use
- Used on split draw rods
- Pleated or Ripplefold™
- When the baton is pulled on one stack, draperies on both sides of the traverse rod open or close
- For Estate™ Traverse Rods only

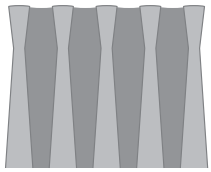
Header Styles

Ripplefold™



- Panels can be pressed flat, yet fall into fold
- No hooks or pins
- Headings are suspended under track
- Stack back is less than conventional pleated draperies
- Draperies snap on/off carriers for easy installation
- Interior drapery appearance is identical to exterior-facing appearance

Pleated



- A classic header option
- Can be used with most track systems using slip-in or pin-on hooks
- Headings can be suspended under the track or over the face of the track to conceal hardware
- Four carriers per foot is standard, additional carriers or rings can be ordered

Hollis™ & Estate™ Traverse Rods: Two Styles. Infinite Ways of Customization.

Not every window treatment is a simple, straight forward project. Sometimes you need more and that's where our traverse rods shine. They are the perfect solution when you need something a little extra, like a pleated or Ripplefold™ custom drapery, a custom pole length, or the oh-so-convenient option of motorization.

There are many ways to customize each traverse rod, we are certain you'll find the perfect solution for your window treatments. It's nice having options, isn't it?

Which traverse rod is right for you?

HOLLIS™ TRAVERSE ROD

Hollis™ Traverse Rod is the perfect solution for creating a uniform look between traverse rods and stationary rods in the same space or throughout the home. Great for tight spaces with it's 1" compact size and coordinating finials. You can even go without a finial and still have a completed look in one of our stunning Designer Metals™ finishes.

ESTATE™ TRAVERSE ROD

Estate™ Traverse Rod is a stately solution better suited for larger projects with a 1⅜" or 2" option. You also have a choice of metal, wood and even wrought iron for a material choice. Not to mention, many finishes and finials to choose from to complete your look.

AMP™ Motorization

Why AMP™?

The slim design of the quiet, yet powerful motor and the position on the track allows the motor to tuck seamlessly behind your drapery panel so you'll never have to sacrifice your style or comfort. For safety measures, you're able to move the draperies with a gentle tug, allowing for operation when a remote is not present or if a guest is unaware of the motorization feature. The dual battery and AC power sources allows operation in case of a power outage so draperies may be opened in the event of an emergency. AMP™ Motorization is available on our most popular traversing tracks, Hollis™ Traverse Rods Estate™ Traverse Rods and Architrac® Series 94001 and in drapery header styles Ripplefold™ and pleated for a variety of styling options. This is comfortable living at its finest.

For AMP™ Motorization brochure, programming instructions and installation instructions, please visit the drapery hardware resource library at kirsch.com.

Benefits & Features

AMP™ Motorization

- Motor mounts to the back of the track which allows a seamless look between motorized and manual traverse rods
- Drapery fabrication does not need to change between manually controlled draperies and motorized draperies; No additional returns or any special instructions
- Limits are set automatically after installation
- Remote control is radio frequency and easily pairs with the motor
- Tug feature; when drapery is pulled the motor will traverse the drapery
- AMP™ App with AMP™ USB Bridge
- Architrac® Series 94001 Rods with AMP™ cannot be bent or curved

Frequently Asked Questions

What is the weight capacity?

64 lbs Motor is rated to 64 lbs. Be sure not to exceed the Estate or Architrac track specifications to ensure your motor operates optimally.

Can you double the weight capacity by using two motors?

No Only use one motor per rod.

Does AMP™ offer limit setting?

Yes The motor automatically sets its limits.

Does AMP™ offer touch control?

Yes The tug feature allows you to pull on the drapery and the motor will automatically open or close your draperies.

How long is the power cord?

6 ft The durable, non-extendable power cord is extra long for out of reach places. Any extra can be rolled and secured for a tidy look. Cable extensions are available in 15", 4', 10' and 20' lengths to reach outlets that are farther away from the motor.

Is there a wall switch?

Yes There are Flush Mount and Surface Mount Wall Switches available.

Does AMP™ offer a warranty?

Yes See the Kirsch Warranty document for more information.

Max. Load	64 lbs

Follow track specifications for drapery weight.

Estate™ Traverse Rods Bracket Spacing & Mount Options

Place brackets at each end. On the ends where the drapery will stack, place the next bracket at a maximum of 24" from the first bracket, then place remaining brackets at 48" intervals over the remainder of the track. Spacing may need to be shortened for heavier draperies. All mounting options are compatible with our AMP™ Motorization.

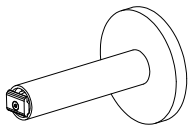
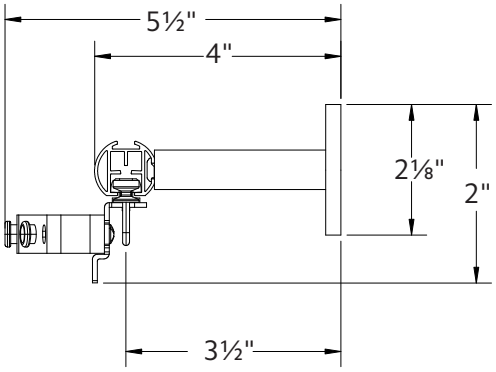
Hollis™ Traverse Rods Bracket Spacing & Mount Options

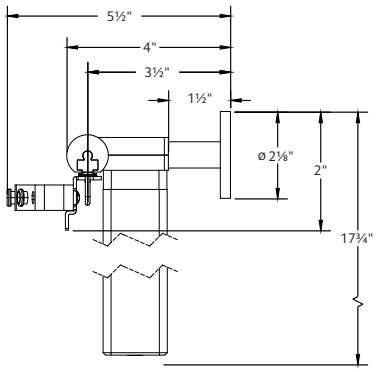
Place brackets at each end. On the ends where the drapery will stack, place the next bracket at a maximum of 24" from the first bracket, then place remaining brackets at 48" intervals over the remainder of the track. Spacing may need to be shortened for heavier draperies. All mounting options are compatible with our motorization.

Hidden Bracket | Wall Mount using parts:

To achieve this look, order Hollis™ Traverse Rod, wall mount hidden bracket and all components will be included.

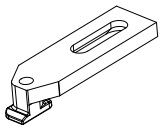


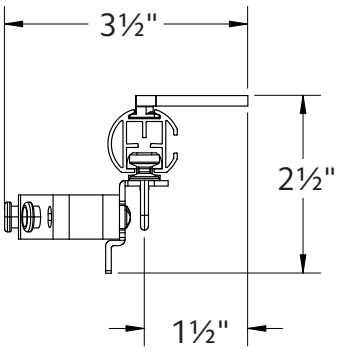
Wall Mount	with AMP™ Motorization
	


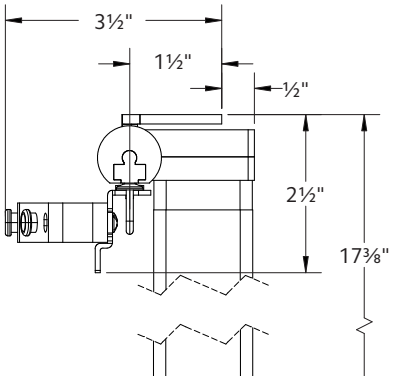


Ceiling Mount using parts:

To achieve this look, order Hollis™ Traverse Rod, ceiling mount and all components will be included.

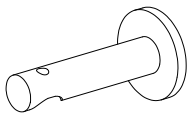


Ceiling Mount	with AMP™ Motorization
	


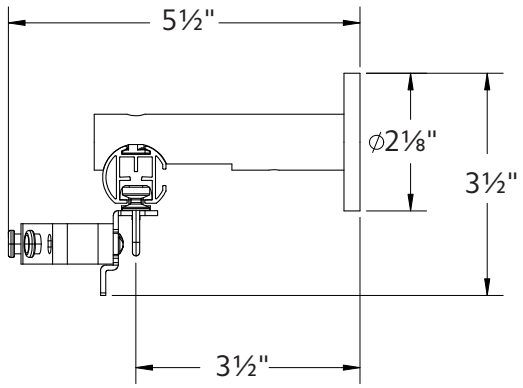


Single Over the Top Wall Mount using parts:

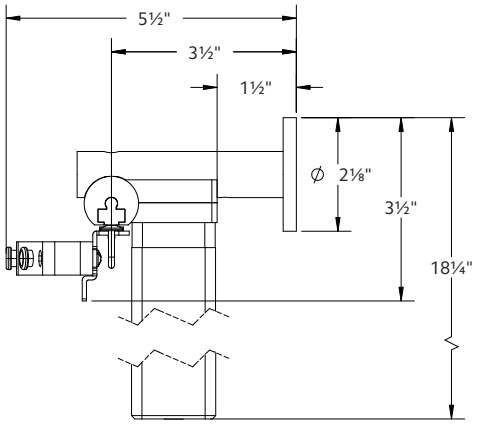
To achieve this look, order Hollis™ Traverse Rod, wall mount over the top bracket and all components will be included.



Single Over the Top Wall Mount

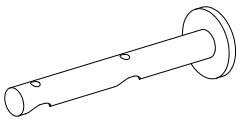


with AMP™ Motorization



Double Over the Top Wall Mount using parts:

To achieve this look, order Hollis™ Traverse Rod, wall mount double over the top bracket and all components will be included.



Double Over the Top Wall Mount

Calculating Drapery Weight

1. Fabric Weight

Some fabric samples list on the back of the swatch the weight listed in Ounces/SqYd (ounces per square yard). Call the manufacturer for the weight if not listed.

2. Lining Weight

Most drapery linings are 2oz - 4oz per square yard.

Drapery Weight Formula

Total Square Yards	= (total yards x 36 x fabric width) ÷ 1296 (1-square yard)
Weight	= total square yards x weight in ounces per SqYd) ÷ 16 oz in lb
Example	32 yards of 54" wide fabric weighing 14 oz/SqYd Total square yards = (32 x 36 x 54) = 62,208 ÷ 1296 = 48 SqYds Weight = (48 x 14oz) = 672 ÷ 16 = 42 lbs

Lining Weight Formula

Total Square Yards	= (total yards x 36 x fabric width) ÷ 1296 (1-square yard)
Weight	= total square yards x weight in ounces per SqYd) ÷ 16 oz in lb
Example	32 yards of 54" wide fabric weighing 6 oz/SqYd Total square yards = (32 x 36 x 54) = 62,208 ÷ 1296 = 48 SqYds Weight = (48 x 4oz) = 192 ÷ 16 = 12 lbs

Fabrics by Weight

Contact the fabric manufacturer for your specific fabric weight.

Fabric Type	Weight per Square Yard
Drapery Lining	2-4oz
Interlining	5-6oz
Blackout Lining	6-10oz
Bump Lining	12-14oz
Silks	2-4oz
Chintz	2-4oz
Printed Cottons	4-6oz
Linens	6-10oz
Jacquards	10-14oz
Velvets	14-18oz

1⅜" Decorative Bracket Weight Chart

Weight capacity shown is maximum per bracket when screwed into solid wood. Weight capacity is reduced when using wall anchors or screwing into other substrates. **Consult a professional for the proper screw and wall anchor for your application as many factors affect the mounting strength.**

Pole Installation, Cutting & Splicing

Top Hole Installation Guide

This chart will position the bracket so the drapery will clear the floor approximately ½".

1. Find your pole style, size and header style in the chart.
2. Determine the desired finished drapery length.
3. Add or subtract number in the top hole column from the drapery's finished length to determine how high to measure for the top hole of the bracket.

Cutting & Splicing Designer Metals™ Stationary Poles

- Measure to desired length and carefully wrap area with an easy peel, blue painter's tape as not to damage the finish.
- Cut through the tape with sharp fine tooth saw. Cut slowly to reduce any chipping to the product finish.
- For spliced poles, add a finial plug to the end cut.
- Splice fits inside the pole and is specific to the pole diameter.
