LINING & INTERLINING

The cost for the actual lining and interlining fabric are **not** included in all of our labor programs. For those programs that do not include lining overall, there may be certain products that do include lining. The product page will note that lining and/or interlining are included in the specifications for that product. MYL does offer a "Lining Fabric Program" to enable you to purchase the lining and interlining fabric directly from us for each individual Order. Our "Lining Fabric Program" includes per yard prices and samples of quality lining fabric at reasonable cost. By taking advantage of this program you will save the time & cost of ordering and shipping the fabric with your treatment Order. Below we have listed the suggested retail prices for the lining and interlining fabric.

Specifications:

- If you supply your own lining, a surcharge of **$26.60** per Order per lining will be charged. You must supply the lining on a "per job" basis, same yardage of lining as face fabric without repeat. Leftover lining will not be returned.
- **Interlining** must be specified. Any product that does not specifically have an interlining product code will be charged an additional 20% for Labor plus the cost of the interlining fabric.
- **Interlining/cotton combo** lining can be used without the interlining labor up charge.
- **Contrast Lining:** No extra charge for Contrast lining.
- **Standard Lining:** Standard lining is a poly/cotton blend. Any of the 50/50 blends in white will be used unless otherwise specified on your Order.
- **Brand Name of Lining:** We stock several top brands of lining fabric using several vendors for our stock lining. If we are out of stock of one brand we will substitute another brand for that lining; however, we will only substitute with like lining type.
- **Warning - Blackout Lining:** Blackout lining does have a black core between the white finishes. Please be aware, a black line that looks like a pencil line may be apparent on the pleats when you are using a light colored fabric. Your option could be using Thermal Suede lining and Interlining for a room darkening effect.
- **Billing for Lining:** Lining yardage is invoiced at the face fabric yardage without repeat given on the pricing charts.

2026 Prices for Lining and Interlining
